

NORTH POLE TRIM & SUPPLIES LTD

MACHINE TO MATCH SERVICE

North Pole Trim and Supplies' "Machine to Match" service is meant to take care of some of the work involved when retrofitting new doors into existing jambs. **Almost every door will need some adjustments by an experienced carpenter when being fit into your existing opening.**

North Pole Trim and Supplies will not do a site visit when **doors do not fit**. In order to make any claim regarding the matching of your doors you must have your original door and show us that we did not copy the door properly.

I have read and understand the above.
